CONTENTS

Preface xi

Curriculum Vitae xiii

Foreword to the collection of papers dedicated to J.H. Flynn and some philosophical thoughts regarding non-isothermal kinetics
J. Šesták and V. Šesták'ová (Prague, Czech and Slovak Federal Rep.) xix

The role of heat transfer in the production of DSC curves
J.S. Crighton and F.W. Wilburn (Leeds, UK) 1

The application of thermal analysis in studying the thermal decomposition of solids
D. Dollimore (Toledo, OH, USA) 7

Empirical kinetic models in thermal analysis
J. Málek (Pardubice, Czech and Slovak Federal Rep.) and J.M. Criado (Seville, Spain) 25

Building and statistical interpretation of non-isothermal kinetic models
J. Militký (Liberec, Czech and Slovak Federal Rep.) and J. Šesták (Prague, Czech and Slovak Federal Rep.) 31

Recommendations for computer-aided data extraction and model search in homogeneous non-isothermal reaction kinetics
E. Koch (Müllheim an der Ruhr, Germany) 43

Kinetic analysis of non-isothermal solid decomposition reactions. An approach to the treatment of experimental data
A. Romero Salvador (Madrid, Spain) and E. Garcia Calvo (Alcalá de Henares, Spain) 67

A computerized system for research into the thermal safety of chemical processes
A.A. Kossoy, A.I. Benin, P.Y. Smykalov and A.N. Kasakov (St. Petersburg, Russia) 77

Analysis of non-isothermal reaction kinetics. Part 1. Simple reactions
R.K. Agrawal (Houston, TX, USA) 93

Analysis of non-isothermal reaction kinetics. Part 2. Complex reactions
R.K. Agrawal (Houston, TX, USA) 111

The evaluation of kinetic parameters from thermogravimetric curves
I.C. Hoare and H.J. Hurst (Menai, NSW, Australia) 127

Using thermoanalytical data. Part 6. Heat transfer contribution in TG/DTA/DSC data processing: non-isothermal kinetics — do they become "applied science" by exiting the "dichotomy"?
U. Biader Ceipidor (Camerino, Italy), R. Bucci and A.D. Magri (Rome, Italy) 137

Some problems concerning the temperature integral in non-isothermal kinetics. Part 3. An approximation of the temperature integral through integration over small temperature intervals
E. Urbanovici (Bucharest, Romania) and E. Segal (Judeţul Covasne, Romania) 153

Estimation of activation energy by isoconversion methods
T. Ozawa (Tsukuba, Japan) 159

An advantageous variant of the Ozawa–Flynn–Wall analysis
J. Opfermann and E. Kaisersberger (Selb, Germany) 167

Practical application of isoconversional methods
S.V. Vyazovkin and A.I. Lesnikovich (Minsk, Byelorussia) 177

A comparative study of the resolving power of both conventional thermogravimetry and constant rate thermal analysis
J.M. Criado, A. Ortega and F.J. Gotor (Seville, Spain) 187

Controlled rate evolved gas analysis: recent experimental set-up and typical results
J. Rouquerol, S. Bordère and F. Rouquerol (Marseilles, France) 193

Thermoanalytical kinetics for solid state reactions as exemplified by the thermal dehydration of $Li_2SO_4 \cdot H_2O$
H. Tanaka, N. Koga (Hiroshima, Japan) and J. Šesták (Prague, Czech and Slovak Federal Rep.) 203
Reliability of kinetic measurements for the thermal dehydration of lithium sulphate monohydrate. Part 1. Isothermal measurements of pressure of evolved water vapour
M.E. Brown (Grahamstown, South Africa), A.K. Galwey and A. Li Wan Po (Belfast, UK) 221
Determination of activation energy in moist and dry conditions for the pyrolysis of $Zn_5(OH)_6(CO_3)_2$
H.G. Wiedemann (Greifensee, Switzerland), A. Van Tets (Pretoria, South Africa) and R. Giovanoli (Bern, Switzerland) 241
The kinetics and mechanism of the thermal decomposition of tetramminecopper(II) sulphate monohydrate
Ž.D. Živković (Bor, Yugoslavia) 251
On a model of thermal internal decomposition of solids
L. Stoch (Cracow, Poland) 259
The zonary model of thermal transformations of alkali metal triphosphates
E.A. Prodan and L.A. Lesnikovich (Minsk, Byelorussia) 269
The effect of water vapour pressure on the kinetics of the thermal dehydration of erbium formate dihydrate
Y. Masuda, K. Hirata and Y. Ito (Niigata, Japan) 289
Thermal decomposition of some salts of hexathiocyanato-platinic acid
J. Zsakó, C. Várhelyi (Cluj, Romania) and G. Liptay (Budapest, Hungary) 297
Study of the solid state reaction of $Na_3[Rh(C_2O_4)_3]$ synthesis
V.A. Logvinenko, G.V. Gavrilova and S.P. Khranenko (Novosibirsk, Russia) 307
Evaluation of the kinetic and thermodynamic parameters for the thermal decomposition of bis(η^5-cyclopentadienyl)titanium(IV) *N,N'*-bis(2-hydroxynaphthalene-1-carbaldene)alkenediamines
V. Joshi, S.K. Jain and N.K. Kaushik (Delhi, India) 311
Problems of $YBa_2Cu_3O_x$ formation and decomposition kinetics and mechanism
J. Šesták (Prague, Czech and Slovak Federal Rep.) and N. Koga (Hiroshima, Japan) 321
Reaction mechanism in non-isothermal synthesis of high-T_c superconducting oxide $YBa_2Cu_3O_7$
N.-L. Wu and Y.-C. Chang (Taipei, Taiwan) 339
Kinetics of the sintering of superconducting ceramics $YBa_{2-x}Sr_xCu_3O_{7-y}$
C.J.R. González-Oliver, J.E. Fiscina, E.A. Oliber, D. Russo and D.A. Esparza (S.C. de Bariloche, Argentina) 353
Kinetics of crystallization in the soda–lime–silica system. Part 1. $Na_2O \cdot CaO \cdot 2SiO_2$ and $Na_2O \cdot CaO \cdot 3SiO_2$ glasses by DTA
N. Koga, J. Šesták and Z. Strnad (Prague, Czech and Slovak Federal Republic) 361
Nucleation and crystal growth in inorganic glass-forming systems. A DTA study
F. Branda (Naples, Italy) 373
Determination of T–T–T and T–HR–T curves from non-isothermal crystallization kinetic experiments
M.T. Clavaguera-Mora, S. Suriñach, M.D. Baró, A. Otero (Bellaterra, Spain) and N. Clavaguera (Barcelona, Spain) 379
Kinetics of short-range ordering in αCu–Al alloys
A. Varschavsky (Santiago, Chile) 391
Martensitic transformations in shape-memory alloys. Successes and failures of thermal analysis and calorimetry
V. Torra (Barcelona, Spain) and H. Tachoire (Marseilles, France) 419
Complex behaviour of specific heat during structural relaxation of $Fe_{73}Co_{12}B_{15}$ metallic glass
E. Illeková (Bratislava, Czech and Slovak Federal Rep.), C. Cunat, F.A. Kuhnast, A. Aharoune and J.M. Fiorani (Vandoeuvre-lès-Nancy, France) 445
The kinetic compensation effect for the thermal decomposition of some polymers
J.R. MacCallum and M.V. Munro (St. Andrews, UK) 457
Kinetics of the thermal degradation of poly(phenylene sulfide)
M. Day and D.R. Budgell (Ottawa, Canada) 465

Cryomicroscopy as a support technique for calorimetric measurements by DSC for the study of the kinetic parameters of crystallization in aqueous solutions. Part 1. Nucleation in the water–1,2-propanediol system
P.M. Mehl (Rockville, MD, USA) 475
The kinetics of autolysis in osmotically stressed sea urchin eggs
R.J. Williams, T. Takahashi and A.G. Hirsh (Rockville, MD, USA) 493
Non-isothermal kinetics: some merits and limitations
T.P. Prasad, S.B. Kanungo and H.S. Ray (Bhubaneswar, India) 503
On the controversies in TA kinetics
H. Anderson (Greifswald, Germany) 515
Thermal analysis kinetics — past, present and future
J.H. Flynn (Bethesda, MD, USA) 519
